SOLUTIONS

80% LOWER TCO

OPEN YOUR MIND FOR OPEN TECHNOLOGIES!

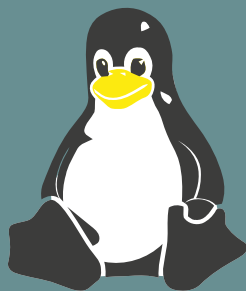

The market is changing faster than ever, but commercial technologies are not adapting at that pace. By using solutions from the Open Source portfolio, COMBIS's experts can help you cope with all the challenges that arise in a modern IT environment!

We are offering design, implementation and maintenance services for solutions based on Open Source technology.

Hyper-converged infrastructure

Scalable Open Source solution for SDS (Software-defined Storage) that aggregates disk space from multiple servers into one. It is both hardware independent and enables using numerous functionalities like quotas, geo-replication, snapshots and alike.

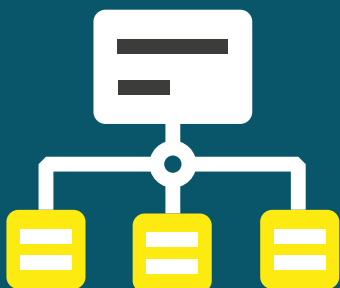

Operating system

You no longer have to pay expensive licenses, lower your TCO by 80% with Linux OS while keeping your system secure and stable with high level of automation.

Automation

Answer to challenge of automating various systems from Linux, Windows, to network devices by implementing Open Source solutions! Speed up your business and make your IT faster, more flexible, more efficient!

Virtualization

Use advanced high-performance system functionalities without limitation to just one vendor!
