## Combis

CASE STUDY

### The data center of the future – has arrived

## BENEFITS:

**Less infrastructure**  
easier maintenance

**Easy system upgrade**  
better ROI, better TCO!

**High scalability**  
more freedom

**Higher performance**  
more IOPS

## Hrvatska pošta Mostar

CASE STUDY

**VMware vSAN** - The first step towards a modern, Software-defined Data Center.

VMware technology for Software-defined Data Center (SDDC) = fast, reliable, flexible, and easily manageable IT infrastructure.

„The implemented SDDC solution is a strong foundation for the new advanced services such as virtualization of all post offices”, said Ivan Sušac, Member of the Management Board of Hrvatska pošta Mostar.
