

Modern Workplace Assessment

Modern Workplace Assessment involves the analysis of current IT tools and infrastructure and business needs of organizational units that can be addressed by Microsoft Office 365 tools. The assessment also provides insight into business requirements and expectations of IT tools, with the aim of maximizing the customization of existing tools and increasing the benefits of collaboration tools. Deliveries of this engagement, along with defining the strategy of using Office 365 tools, implies defining all other preconditions for the realization of the defined strategy.

What is included in Modern Workplace Assessment?

Methods used in assessment:

- a snapshot of the existing IT state using a specialized software
- survey as a tool for collecting business requests
- meetings with business units
- workshop on business use of Office 365 tools

Participants:

- IT
- business (internal communications, human resources, marketing, other relevant business units)

Duration of the assessment:

10 days

For whom is Modern Workplace Assessment intended?

To all medium and large organizations looking to get a clear definition of all the necessary prerequisites for implementation of digital transformation of the work environment using Microsoft Office 365 platform. Whether it's about companies that want to make better use of the technology they have already invested in or companies that are in process of still planning their use of Office 365 tools.
