

F5 Distributed Cloud Bot & Risk Management

Apps have become the Centre of our Digital Economy

XC Account Protection

Powerful Artificial Intelligence for Online Fraud Protection. Distributed Cloud Account Protection blocks fraud missed by existing tools, slashes friction for legitimate consumers by up to 90%, and reduces workloads for fraud teams.

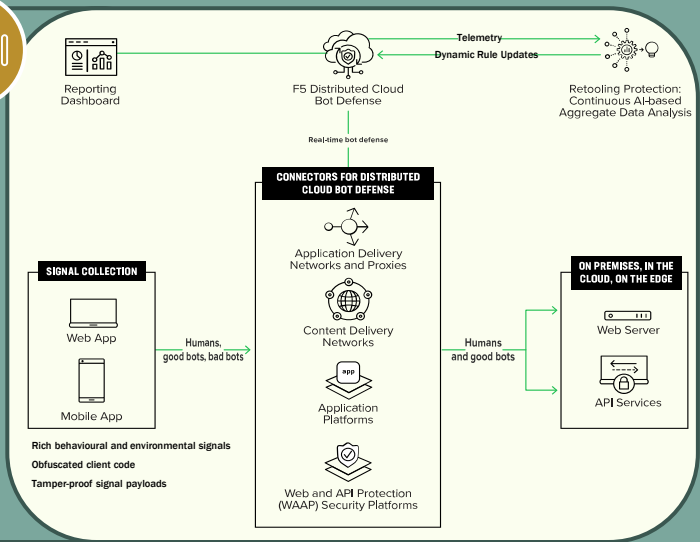

Bot management is the practice of ensuring the integrity of online communications by limiting access to only authentic human users and "good bots," under controlled and approved conditions.

XC Bot Defense

Bot Protection for APIs and web and mobile apps. Defend against malicious bots and automated or human attacks. Ensure safe, fast, and seamless user experiences. Prevent bad actors for manipulating apps and sites at the detriment of customers and brands.

CISO

- Make apps more secure and prevent downstream fraud by stopping account takeover (ATO)
- Reduce fraud without adding more friction

Chief Fraud Officer

- Shift scope of fraud detection further
- Stop attacks like ATO and account enumeration
- Feed new telemetry and signals into fraud orchestration system with Data Intelligence

Business Owner

- Grow business by reducing costs by mitigating bot and fraud related harm
- Preventing revenue loss from customer churn
- Augment fraud and security team efforts
